PROJECTS

Personal Portfolio

- Developed a personal portfolio website that highlights a diverse range of projects, demonstrating expertise in web development, design, and user experience.
- Regularly updated portfolio with new projects and skills acquired, reflecting a commitment to professional growth and adaptability in a fast-paced industry.

Phone Book Website

- Built a user-friendly phone book application using Vite and React, enabling users to efficiently manage contacts with features like adding, editing, and deleting entries.
- Utilized React's state management and integrated API calls to ensure real-time data updates, enhancing the application's responsiveness and user experience..

Quiz Application

- Developed a Java-based quiz application with different difficulty levels.
- Included features such as multiple-choice questions, scoring, and user feedback, allowing users to take quizzes and view their results.

To-Do-List

- Developed a command-line TODO list application in Java.
- Implemented features such as adding tasks, marking tasks as complete, and deleting tasks.
